# 4D SECURITY FOR YOUR BUSINESS

Let's start securing your business today, so *you* can focus on doing what you truly love — *growing* your business.

- > Do you know if your business has protection on all angles? Are you unsure where to start?
- > Are you as secure as you could be?
- > Do you feel like the sharks and phishers are circling, trying to snag a bite?
- > Since the phishing attacks target the weakest link in security (humans), are your employees prepared to identify the threats?
- > Would you know if you were breached? Even small organizations can fall victim.
- > Do you have a recovery plan in place, tested and ready if an incident occurs?

## No more worries and midnight anxiety about your business security, we have you covered!

Our dynamic industry knowledge, customizable tools & services, combined with decades of experience, will help you enhance your ...

- > security awareness and event management,
- > employees' cybersecurity sophistication,
- > email & network security,
- > vulnerability identifying mechanisms,
- > intrusion management, and
- > business continuity & disaster recovery abilities.

It will be like having a top-notch home alarm system - you see it, you trust it, and it gives you control and peace of mind.

# 4D SECURITY FOR YOUR BUSINESS

## CYBER SECURITY FACTS

According to IBM's 2023 Cost of a Data Breach report, the average cost of a data breach in the United States in 2022 was \$9.48 million.

Phishing remains the most common cybercrimes in the world, with approximately 3.4 billion daily spam emails.

On average, there is a hacker attack every 39 seconds.

Nearly half of all data breaches (45%) occur in the cloud.

There are more than a billion malware programs out there, and more than a half-million (560,000) new pieces of malware are detected every day.

**Secure your business with us!**

### Tera Partners Inc.

Managed IT Services Provider

780 East Market Street, Suite 110

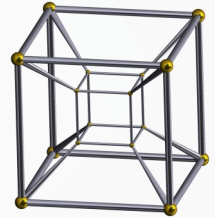

West Chester, PA 19382

Phone: 610-550-3100

### Our Approach

- > We take a holistic approach, looking at the whole enterprise to identify weaknesses/vulnerabilities. We call it a **4D Security**.
- > We use leading security technologies to arm you with proven security solutions.
- > We provide you with detailed **ONGOING** monitoring, online reports & recommendations on all aspects of your organization's technology environment and our security management measures results, including:
  - On-premise firewall & Network profiles
  - Backup configurations and status
  - Recent vulnerability findings and Metrics
  - Patch Management and Metrics
  - Current remote access policies
  - Recent penetration test results
  - Active user, internal and external (vendor/client) activities
  - Latest employee awareness training date & results
  - System logs, identified unusual patterns & intrusions
  - Audit of your cloud environment
  - Developing and Testing DR and IR plans

### Your Benefits

- > **Reduced insurance risk/costs**
- > **Security visibility - continuous security monitoring and dynamic reports on IT systems, networks, detected security threats, or non-compliance problems**
- > **Highly improved security control and management**
- > **Potential problem and threat identification in real time to address them proactively**
- > **Staff cybersecurity competency that matches the latest skill and knowledge requirements needed to shield the organization's cyberspace**
- > **Risk and cost reduction by eliminating the possibility of compromise**
